GWM Asset Management Moderately Adventurous

Portfolio Objectives

GWM Asset Management aims to manage the portfolio to a volatility range of between 10.7% and 12.3% over rolling 10 year time periods. This is not guaranteed and actual volatility may fluctuate outside of these boundaries. The portfolio will be predominantly invested in equities, with some exposure to fixed income and other defensive assets. Equity exposure will range between 65% and 80% at the time of investment.

Commentary

Against a backdrop of big upward revisions to expected economic growth in 2021 and sharply higher inflation, the second quarter of the year saw further gains in stock markets and, perhaps surprisingly, falling bond yields. The UK stock market rose by another 5%, taking its year-to-date gain to more than 11%. In the first quarter of the year, economically sensitive 'value' stocks trounced 'growth' stocks. Over the last three months and despite an accelerating economic recovery, however, growth stocks outperformed value stocks by a wide margin as bond yields fell. This demonstrates just how difficult it is to pivot between growth and value in portfolios and we therefore continue to advocate a broadly even balance between these two factors. We remain generally constructive on equities, particularly when compared with bonds and cash. However, our enthusiasm is tempered by lofty valuations and hence the low margin of safety if inflation becomes embedded and interest rates have to rise.

> Remaining constructive on equities but valuations are lofty

**Estimated Charge: Weighted average of the OCF of all holdings. Where OCF is unavailable TER is used. The actual charge may vary depending upon Platform. Please note: Historic yield figures will only be provided for funds with at least 12 months of performance history. Where quoted, the yield is the aggregate and weighted position of each underlying fund within the portfolio and is based on the yield published by the manager of each respective fund.
