Portfolio Objectives

Square Mile aims to manage the portfolio to a volatility range of between 9.1% and 10.7% over rolling 10 year time periods. This is not guaranteed and actual volatility may fluctuate outside of these boundaries. The portfolio will be predominantly invested in equities, with some exposure to fixed income and other defensive assets. Equity exposure will range between 53% and 68% at time of investment.

Performance & Volatility to 30/09/2019

*3 & 6 month volatility are not displayed as we regard these as too short-term. Volatility numbers have been annualised. 3, 5 and since launch performance numbers have been annualised in the graph below only. Past performance is not a reliable indicator of future results.

Commentary

The portfolio made modest progress over the summer months. Bond markets were very strong and the continued strength of the dollar increased the value of the portfolio's international holdings. Growth in the global economy continues to slow and we are becoming concerned that it may peter out entirely and could even turn negative. Global Central Bankers are alive to this threat and have started to cut interest rates. However, this may prove too late as it takes time for lower rates to stimulate growth. Profits growth will slow and could decline as a result. We are taking action to move the portfolio to a slightly more defensive footing in case markets stumble. Over the long term, equity markets continue to offer a relatively attractive yield and return potential, in a world which is increasingly bereft of other investment opportunities.
