GWM Asset Management Very Adventurous

Portfolio Objectives

GWM Asset Management aims to manage the portfolio with a volatility greater than 13.9% over rolling 10 year time periods. This is not guaranteed and actual volatility may fluctuate outside of these boundaries. The portfolio will be predominantly invested in equities, with some exposure to fixed income and other defensive assets. Equity exposure will range between 90% and 100% at the time of investment.

Performance & Volatility to 30th June 2023								
Performance	3 Months	1 Year	Since Launch	2022	2021	2020	2019	2018
Portfolio	0.9%	7.6%	-6.9%	-10.9%	-	-	-	-
*Volatility		12.3%	12.1%	12.9%	-	-	-	-

^{*3} months volatility is not displayed as we regard this as too short-term. Past performance is not a reliable indicator of future results. Returns are net of income reinvested and investment management fees in GBP. Performance does not consider platform or adviser fees. Performance numbers are shown in discrete periods and volatility numbers are annualised. Ex ante transaction costs shown below are the expected transaction costs which include trading costs, broker commissions and spreads.

Risk Rating

Risk	The portfolio will be managed to remain within a Finametrica Risk Score of 90 to 100.			
Descriptor	Very Adventurous			
Expected Volatility (10 year average) (%)	Greater than 13.9%			

Commentary

Markets remain fixated on inflation and what this means for interest rates. Whilst price rises are slowing in some areas others are proving more stubborn. This may be due to wage pressures and potentially some, but not all, companies improving profit margins. Interest rates continue to rise, though the full impact on consumers may yet to be felt. Savings made during the pandemic, coupled with higher wages may offset some inflationary effects, but these savings are being drawn upon and higher mortgage rates will feed through more gradually. This will be very important for the global economy and corporate earnings in the quarters to come. Whilst a world-wide recession does not appear imminent and labour markets remain robust, we do not expect the inflationary or economic journey to be a straight-forward one. It may be a case of a recession delayed rather than avoided.

Inflation and interest rates dominate markets

Please note: Historic yield figures will only be provided for funds with at least 12 months of performance history. Where quoted, the yield is the aggregate and weighted position of each underlying fund within the portfolio and is based on the yield published by the manager of each respective fund.

^{**}Estimated Charge: Weighted average of the OCF (Ongoing Charge Figure) of all holdings. Where OCF is unavailable TER (Total Expense Ratio) is used. The actual charge may vary depending upon Platform.
