# GWM Asset Management Adventurous

#### Portfolio Objectives

GWM Asset Management aims to manage the portfolio to a volatility range of between 12.3% and 13.9% over rolling 10 year time periods. This is not guaranteed and actual volatility may fluctuate outside of these boundaries. The portfolio will be predominantly invested in equities, with some exposure to fixed income and other defensive assets. Equity exposure will range between 78% and 93% at the time of investment.

#### Commentary

The second quarter of 2024 highlighted the diverse economic growth among major economies. The US economy showed resilience, while the UK, emerging from a mild recession, saw flat growth in April after a brief expansion, mirroring broader Eurozone trends. A notable shift occurred when the European Central Bank became the first major central bank to lower rates by 0.25%. Prospects of rate cuts boosted equity markets, leading to rallies in Europe and particularly the UK as investors anticipated looser monetary policy and better economic conditions. Gains in US equities were driven by the tech sector, with Apple and Microsoft performing strongly and NVIDIA briefly becoming the world's largest company. Bond markets were volatile amid uncertainty, but easing inflation led to declining yields in the US and UK towards the end of the quarter. Volatility is expected to persist due to elections, conflicts, and shifting monetary policy sentiments.

Inflation and interest rates remain key concerns for investors

Please note: Historic yield figures will only be provided for funds with at least 12 months of performance history. Where quoted, the yield is the aggregate and weighted position of each underlying fund within the portfolio and is based on the yield published by the manager of each respective fund.

<sup>\*\*</sup>Estimated Charge: Weighted average of the OCF (Ongoing Charge Figure) of all holdings. Where OCF is unavailable TER (Total Expense Ratio) is used. The actual charge may vary depending upon Platform.
