

GWM Asset Management Moderately Adventurous

Portfolio Objectives

GWM Asset Management aims to manage the portfolio to a volatility range of between 10.7% and 12.3% over rolling 10 year time periods. This is not guaranteed and actual volatility may fluctuate outside of these boundaries. The portfolio will be predominantly invested in equities, with some exposure to fixed income and other defensive assets. Equity exposure will range between 65% and 80% at the time of investment.

Commentary

The second quarter of 2025 was defined by policy uncertainty: trade shocks, geopolitical risk, and cautious central banking. Growth was sluggish, inflation resilient, and markets volatile. The portfolios had a solid second quarter rebounding after the chaos of the Liberation Day tariffs and benefitting from solid absolute returns from all the underlying segments. Elevated levels of uncertainty about the outlook for both trade and fiscal policy, and consequently growth and inflation, may make for a bumpy ride for markets in the second half of 2025, as investors react to Trump, and to new data on both growth and inflation.

**Estimated Charge: Weighted average of the OCF (Ongoing Charge Figure) of all holdings. Where OCF is unavailable TER (Total Expense Ratio) is used. The actual charge may vary depending upon Platform.

Please note: Historic yield figures will only be provided for funds with at least 12 months of performance history. Where quoted, the yield is the aggregate and weighted position of each underlying fund within the portfolio and is based on the yield published by the manager of each respective fund.
